generalized Boolean n-cube network 589

hard real-time system 111
hardware allocation 199
hardware allocator 185
HDL 525
Helios operating system 137
Heterogeneous Distributed Database System (HDBMS) 747
Hidden Markov Models (HMM) 549
High Performance Parallel Interface (HIPPI) 575
high-level language processor 29
high-performance digital system 315
HLD language 413
host environment 127

IBM ring network 817
image coding 343
image data reduction 453
image understanding 437
incremental design 227
industrial quality control 807
inference control 755
integrated software environment 393
Intel i486(tm) microprocessor 179
interconnect capacitance 61
interconnection network 593
interprocess communication 145
interval temporal logic 517

Kautz graph 593

language extension 271
large distributed system 583
linear algebra problem 825
load-balancing mechanism 153

massively parallel computer 7, 39
Massively Parallel Mixed Architecture (MAPMAS) 471
mathematical procedure 163
message passing 137
micro-instruction 23
micro-instruction algorithm 23
microcontroller instruction set 193
microprocessor system reliability 861
MIMD 7, 39, 45, 171
MINIX 145
Modula-2 625
modular manufacturing system 799
morphological filter 447
MOS transistor network 783
MULPLIX operating system 45
multi-SIMD 39
multicast support 145
multidimensional complex object 765
multilayered dielectric media 61
MULTIPLUS 45
multiprocessor bus system 709
multiprogramming 137

networking 575

object-oriented 263
object-oriented concurrent language 137
object-oriented interface 463
object-oriented modelling 93
object-oriented programming 85
object-oriented system analysis 101
Occam 739
Occam programming 393
open system 401
operation scheduling 199
optimization 69, 75
order recursive algorithm 557

parallel architecture 171
parallel computer 237, 289
parallel cyclic reference counting 53
parallel image sensing 335
parallel processing 45
parallel processor simulation 479
parallel program 479
parallel programming 463
parallel solution 817
parallel transmission lines analysis 61
performance evaluation 825
performance visualization 479
Petri net 799
Petri-net based simulator 565
Petri-net technique 111
phase distinction 603
power measurement 163
problem domain entities 101
process migration 153
programming environment 401
programming myths 3
Prolog 307, 425, 471, 497
Prolog implementation 505
Proportional-Integral-Derivative (PID) controller 701
protocol specification 731
protocol validation 723
Protocol Validation Development (PVD) 281

real-time computation 119
real-time embedded software 127
real-time expert system 799
real-time system 861
real-time video 343
reconvergent fanout analysis 835
Reed-Solomon codes 843
regular combinatoric structures 69
regular interconnection network 583
ring notation 75
RISC processor 497
rollover mechanism 243
routing 417, 425
routing algorithm 593
routing hardware 593
routing strategy 153

segmentation 447
sequential general decomposition 657
sequential machine 531, 657
service specification 731

shared memory 45, 53
signal processing 709, 807
signature analysis 843
SIMD 7
SIMM 179
simulated annealing 23
simulation environment 479
simulation tool 651
singular value decomposition 453
SMALLTALK 85
software lifecycle management 603
software quality management 609
spatial database 765
speech recognition 549
stable state exploration 723
Stable Transaction Memory (STM) 359
state estimation 817
system identification 557
system specification 383
systems programming language 625

temporal logic 111
temporary fault 861
test generation 525, 791
Test Access Bus (TAB) 221
testability analysis 675
testability measure 835
texture analysis 807
3D hardware package 171
timing driven design 227
timing verifier 645
tools integration 401
transformational development 617
transputer 463
transputer system 825

user interface generator 401

vector generation 853
verified concurrent controller 299
verified hardware design 691
VHDL 85, 323, 593
Virtual Object Oriented Machine (VOOM) 289
visual language 383
visualization tool 479
VLSI 101, 227
VLSI design environment 85
VLSI-realization 163

X.25 implementation 739
X.25 specification 739
